

## **One by one private course**

On this Beginner training course, you will learn classic lash application, also known as the 1:1 method, where one single synthetic lash is placed onto each natural lash. Our Classic training course provides you with the foundation you need to progress onto volume and advanced eyelash treatments.

### **Physiology, Safety and Insurance**

- Allergy tests: what are allergy tests, why are they important.
- Client consultations: understanding what you client wants from their treatment and how to build rapport.
- Contraindications: what is a contraindication and how to ensure your clients can enjoy eyelash extensions safely.
- Health and safety: including eye safety, how to handle tools and ensure the safety of your clients.
- Insurance & Professionalism: how to conduct yourself as a technician and the day to day safeguarding you need.
- Human lash cycle: how eyelash growth impacts the effect of lash extensions over time.

### **Application, Technique and Practice**

- Types of lash extensions: including the effects of different curls, finishes and structures.
- Adhesive/glue management: how to ensure that you're using the right glue for your lashing technique.
- Application, isolation and attachment: the good stuff - practical, hands-on training to practice the classic eyelash extension techniques. We split the day in two- in the morning, you practice applying eyelash extensions on a mannequin head, in the afternoon you apply extensions onto live models.
- Mapping and styling / eye shapes: learn popular styles for classic eyelashes, including different shapes such as: cat eye, doll eye etc.
- Infills: how to maintain beautiful lash extensions for your clients with infill techniques.

## **After the Appointment**

- Maintenance and aftercare: how to encourage clients to take care of their extensions, including aftercare instructions.
- Removals: How to safely remove eyelash extensions without causing damage to the natural lashes.
- Pricing your service: how much should be charging for eyelash extensions?
- Social media: how to promote your lash extensions via social media
- Product recommendations: our training courses even set you up with recommendations for the best eyelash products for classic lashes.
- How continuing professional development is key for eyelash technicians to learn new skills and techniques such as volume techniques.
